

HOLLOW STEM AUGER

WDC Exploration & Wells has traditionally been referred to as the leading air/mud rotary drilling company in the western United States.

We have assembled the nation's premier hollow stem auger operation by employing the drilling industry's finest field management and drilling staff, and providing them with an array of new equipment.

Right drill, right driller.

New rig advantage.

Old and poorly maintained equipment is unsafe and cannot live up to the WDC Standard of delivering the safest, most efficient equipment and personnel to your project.

In the "Era of Safety", can you afford anything less than the stunning commitment to safe productivity WDC has made?

SERVICES

Borings – Environmental & Geotechnical

- 1 1/2", 2" and 2 1/2" Samplers
- Standard Penetration Testing – (SPT)
- 4" CME Continuous Coring
- 3" Shelby Tube Sampling
- Simulprobe Depth Discreet Water Sampling
- Hydropunch Depth Discreet Water Sampling
- Direct Push Sampling
- 94mm Wireline Soil Coring
- HQ / Triple Tube Wireline Rock Coring
- Rotary Wash
- Rigs Equipped with Hydraulic Auto Hammers
- 18" Boring Diameter Capability

Sub-Surface Installations

- Monitoring Wells – Single, Multiple, and Cluster
- Bioremediation / Carbohydrate Injection Wells
- Soil Vapor Extraction Wells
- Air Sparge Wells
- Piezometers
- Soil Gas Monitoring Probes
- Anode Bed / Cathodic Protection
- Inclinator Installations
- Well Development

PERSONNEL

All WDC operators and rig hands are highly trained drilling professionals with the training, experience and skills required to perform work at any site including:

- At least five years of drilling experience
- All Major Oil Company Specific Training - Refinery & Retail
- OSHA 40 Hour HAZWOPER Training
- MSHA Training
- OSHA Certified Forklift Training
- WDC SAFETY ALWAYS Training

EQUIPMENT

WDC operates the nation's largest fleet of high torque 2003-2005 model CME drilling rigs, support trucks and decontamination units.

- CME-95
- CME-85
- CME-75
- CME-75 Limited / Low Access
